

Amendments to the Claims

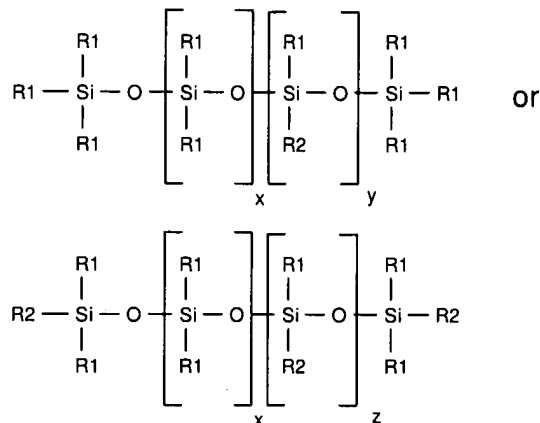

1. *(canceled)*

2. *(canceled)*

3. *(previously presented)* A process for making a vesicle composition comprising;

I) combining,

A) 2 to 25 wt % of a silicone polyether copolymer having a structure represented by:

where R1 represents an alkyl group containing 1-6 carbon atoms;

R2 represents the group $-(\text{CH}_2)_a\text{O}(\text{C}_2\text{H}_4\text{O})_b(\text{C}_3\text{H}_6\text{O})_c\text{R}_3$;

x is 251-1,000; y is 1-500; z is 1-500; a is 3-6; b is 4-20; c is 0-5;

and R3 is hydrogen, a methyl group, or an acyl group,

B) 2 to 30 wt % of a water miscible volatile solvent,

C) water in a sufficient amount to provide the sum of the wt% of A), B), and

C) to equal 100%,

to form an aqueous dispersion of the silicone polyether copolymer,

II) mixing the aqueous dispersion to form a vesicle composition having an average particle size of less than 0.500 micrometers,

III) removing the water miscible volatile solvent from the vesicle composition.
